

How to Build Per Domain User Profiles

Go to Profile Tab/ "Profiles"

Click 

Add a Username and Password.

You will need to record the Password.

Select User type: USER

User: has limited access to the server and has separate configuration from many of the global settings

(See Feature Differences between an Administrator and a User in the Web Interface Manual)

Enter the correct expression for the address matches when creating this User Profile.

/domain\.com\$/i

Apply a brand if required
