

Required Ports for Netcleanse Functionality

14-Jan-07

For Inbound Mail:

25	for mail.
22	for SSH Remote Access
33333	for HTTPS Remote Access
28233	for Back-ups and updates
32005	for clustering.
3310 and 9999	Virus scanners use these ports (this is for local host applications, Don't need to be open on the firewall)
33323	for RPC (doesn't need to be open on the firewall).
123	For NTP

When filtering outbound mail:

All ports > 1024

53	UDP DNS
25	TCP SMTP
